## Scholarships and Career Opportunities

## Arboriculture Today— A Blend of Art and Science

IT'S NOT JUST CLIMBING TREES...

Today's arborists need to know about Global Positioning Systems, supersonic air tools, electronic tree inventories, hand-held computers and scientific procedures, equipment and techniques. The sciences of arboriculture and horticulture have gone high tech – it's not all about ropes and carabiners anymore.

### ARBORISTS HAVE A CAREER WITH A VIEW

You don't have to work in an executive's corner office to get an interesting view. A career in arboriculture offers diversity and options – degrees in forestry, horticulture and botany open up many opportunities within the arboricultural industry whether you're working in a laboratory, city, forest or (even) an office.

## The Bartlett Tree Foundation Can Help You Achieve Your Educational Goals and Begin a Career in Arboriculture

The Bartlett Tree Foundation, Inc. is a private foundation under section 501(c) (3) of the Internal Revenue Code whose original funding was provided by Bartlett family members and The F. A. Bartlett Tree Expert Company. This funding continues today, as a primary source of support. The mission of the Foundation is to mentor future generations of arborists and advance the science of arboriculture. The Foundation's aim is to promote awareness about the arboricultural industry and to provide eligible students with the resources they need to earn a degree and pursue a career in the field.

### ENCOURAGING STUDENTS WITH SCHOLARSHIP AWARDS

The Bartlett Tree Foundation, Inc. provides financial assistance for worthy students of arboriculture, horticulture, forestry and related disciplines at both 2-year and 4-year colleges and universities. Bartlett Scholarship endowments have expanded since its founding in 1985 to presently include over 24 institutions across the USA.

Interested in getting a degree in arboriculture? Bartlett can refer you to academic programs in your area.

### SCHOLARSHIP QUALIFICATIONS

The Bartlett Tree Foundation provides \$2,000.00 in scholarship funds annually to participating 4-year and 2-year college programs. The participating institutions, in accordance with their criteria, select the student recipients.

The recipients must be actively enrolled in a course of study that leads to a degree or diploma in arboriculture, forestry, urban forestry, horticulture, plant pathology, botany or some other closely related discipline. Students must maintain a sufficient grade point average to ensure earning a degree. Good character, worth of recognition and financial need are also determining factors for student eligibility.

## What Bartlett Tree Experts Can Do for You

### START AT THE BOTTOM, AND WORK YOUR WAY TO THE TOP

Get started in a career in arboriculture while you're working on a course of study or a degree. Bartlett Tree Experts offers internships to qualified students. You can earn extra tuition money between terms working at a Bartlett office. Gain experience and practical arboricultural knowledge to prepare yourself for advancement. If you're 18 or older, responsible, physically qualified, have a good attitude and want to get started, we can put you to work at Bartlett.

### CONTINUE YOUR EDUCATION WHILE YOU DEVELOP YOUR CAREER

Bartlett conducts lectures, demonstrations, career days, field experiments and other events on and off campus at participating colleges and universities and other institutions. We also offer rewarding careers to graduates. While under no obligation, many choose careers with Bartlett.

At Bartlett, your education doesn't end when you graduate. We can train you for a variety of challenging careers, from general tree care to sales to management.

The scientists at the Bartlett Tree Research Laboratories develop programs, techniques and testing equipment that set the standards for the tree care industry. You'll always be at the forefront of arboricultural science and continue to learn about new procedures and equipment.
